The lecturer gave an analysis of the scope of expression in the different arta, assuming the following order of excellence. Music, poetry, painting, sculpture and architecture, rating histronic arta a mingling of poetry in text, sculpture in pose and annual in intellection. He declared the art of earth to be a mere prophecy and suggestion of what man would be in a future state, and claimed that the fine arts in their ministry are in reality a universal language, and that sentiment is the dominant quality in true art. The sculpture of the Greeks was never dramatic, as they avoided giving expression, and with the study of the drama and anatomy our modern sculptors about preasing, and with the study of the dram and anatomy our modern soutptors should excell. This branch takes its highest form in the menumental, but George Washing ton on a dray horse, with arm uncomfortably extended, is not to be taken as a mode. While in painting, light and shade necessitate color, all attempts to color works of the sculptor have failed. The ancient artists had no colors, and our modern chemists have done much for painting. This branch of the arts differs from the others, in that all is given as a stroke and but a mement of time is represented, and in this ciement a picture is necessarily shorter than a poem or a novel, but even poetry takes refuge in human figures.

In considering music, the speaker main lined that it operates directly on the emotions and is not limited by intellectual notion. It is the highest form of art, and there are conceptions which can never be placed on the staff. This at home re-

The stage, the platform and the drama ware all reviewed, and the conventionalities of the modern theater as representing art were repudiated. The strong does to which the public was subjected were up to produce a morald offect. Of modern literature the colonel thought that the French school had proven a direct colonical many that the French school had proven a direct colonical. We do not want shadow for shadow's asirs, but for the sake of light. The great art of the student mowadays is to know what not to read, Even Thomas Moore wished that his own daughters might not read his poems.

A great musician can play a picture and a great painter can point a song.

The real poots, painters and actors, as well as novellets, were brifty considered and their excellence and defects pointed stit.

A most pleasunt and instructive feature of the evening was the "question box," out of which much valuable information as to the great modera artists, writers and actors was drawn. EIGHT CENTS A DAY

Will Enable Any Citizen In America to Secure the Best Encyclopadia, namely, the Americanized Encyclopædia Britannica.

Three things ought to find a place in every American home: The Sacred Scriptures, a good newspaper and a thoroughly reliable encyclopædia. The first we are quite sure every family in which our paper is taken already enjoys; the second it has been the business of our lives to furnish; the third we place at the disposal of our readers from this moment. Eight cents a day for eight months will hereafter enable any citizen to secure a complete set of the Americanfzed Encyclopædia Britannica, which, after a careful examination, we confidently believe to be the most complete, reliable and altogether the best work of its kind extant to-day. This is another illustration of 'the motto that lies at the base of American institutions: In union there is strength. We have simply organized our readers into a club of encyclopmdia buyers, and obtained from the publishers the concessions which so arge an organization has the legiti mate right to demand. Our reward will come in an increased circulation, which, spain, will probably enable us to secure similar advantages for our subscribers in some other direction. This is as it should be; the publishers and readers of a great newspaper should work together for mutual ad-

vantage.

What the publishers have done is to take the Encyclopadia Britannica to pieces and rebuild it with amendments and improvements. The latest or ninth edition of the original work was compiled some fifteen years ago: | : the American editors have revised it exhaustive descriptions of English towns, cities, counties, boroughs, minor institutions and other matters of peculiar interest to Englishmen. and to Englishmen alon, while American subjects were treated with the same bravity as French or German. The American editors have reversed this method-condensed the articles on distinctively British aublects within reasonable limits, and utilized the space thus gained for exhaustive discassions of purely American topica, The original work excluded from its plan all mention of individuals, however famous, who were alive at the time of its compilation; it says not a word of more than half the men whose names are written on the pages of codern history-no word of Grant or Sheridan or Sherman, Havriet Beecher Stowe, Julia Ward Howe or Elizabeth Stuart Phelps, of Cleveland, Harrison or Blaine, or Parnell, Salisbury or Bismarck. This woful lapsus, too, has been supplied in the Americanized edition. A series of 4,000 biographies, each brought down to the present year, enables the reader to learn at a stance the life story of every noted individual of the present generation. To all this add a complete series of mans and a number of well-executed engravings illustrative of the text, and the Americanized Encyclopædia Britannies is before you-a work in whose introduction to our readers we

feel a not unwarrantable pride. We will give THE DAILY HERALD one We will give THE DAILY HERALD one year and Les set of Locyclopedias for \$50. So down and \$2.50 per mon's till paid; The SUNDAY HERALD and the set for \$22.50, and THE SUNDAY HERALD End the set for \$25.50, also in mouthly payments if desired. YOU WOULD LIKE TO KNOW

What the Americanized Encyclopædia Britannica is? It is the most complete and diversified

Library of Entertaining Literature

Ever issued from the press. Open its pages where you will, you will find something to attract and interest you. If you are food of history, it contains the finest collection of histories in

the world, embracing every nation of ancient and modern times, from houry Egypt, with its civilization running back for thousands upon thousands of years, to the latest born of the great family of nations. And they are not dry as dust histories, either, giving nothing but dates and mere descriptions of events; but genuine historical works, as interesting as kincaulay's History of England, and some of them from Lord Macaulay's pen. Or if you have a taste for travels and descriptions of strange countries and their peoples, the AMERICANIZED ENCYCLOPÆDIA BRITANNICA will lead you with the famous voyagers and explorers among the sunny islands of the Southern Seas, through the dreary waster of Arcticice, across the pathless wilds of Africa, or among the quaint peoples of the East. It will tell you of the vanished civilization of Peru, of the growth or subsidence of feudalism in Europe, of the social and governmental polity of modern nations. And if, while you are reading, you come across some reference to a great man with whose deeds you are unfamiliar, the Americanized Encyclopædia Britannica contains a perfect library of biographical memoirs, to which you can turn with the certainty of finding just exactly what you want to know.

Are you interested in science? The Americanized Encyclopædia Britannica will tell you, in clear, understandable English, all about any science you may wish to study. Are you carious about mechanical inventions? The 7 padia describes them all. Or perhaps you want information industry or mode of manufacturing? Again the Encycle ...uiy to

ading to your your hand; a moment's turning of its pages brings the pr ... count of the entire eyes, and there before you lies a complete and exhaustisubject. In short, whether you want amusement for an adle hour, solid instruction for more serious moments, or quick information about any matter as to which you are in doubt, the

AMERICANIZED **ENCYCLOPÆDIA** BRITANNICA

IS THE MERY THING YOU NEED.

Why Americanized Encyclopsidia Britannica? Because that is just exactly what it is—the Encyclopudia Britannica revised and amended for American use. You want your Encyclopædia to tell you about Grant and Sherman and Sheridan and Hancock and Cleveland and Harrison, don't you? Well, the Encyclopedia Britannics won't do it. But the Americanized edition will. The latest edition of the original Britannics was compiled fifteen years ago, and gives no biographies of persons who were living at that time. Maybe you don't know that? The Americanized edition contains hundreds of new biographies, specially written for its pages, and including every prominent man

You want fuller information about an American State than about an English county, don't you? You won't get it in the Encyclopædia Britannica, but you will in the Americanized Encyclopadia Britannica. Because the former work was compiled specially for the use of Englishmen, while the latter has been amended and revised especially for use in American homes. See?
